Important Request from the City of Quinter

Dear City of Quinter resident,

The Kansas Department of Health and Environment (KDHE) and Environmental Protection Agency (EPA) have made changes to the Lead and Copper Rule regulating water systems. They are requiring all systems to identify any lead that may be in our system and remove it.

We are required to identify the main lines as well as all customers' lines. We would like to ask for your help in this in **filling out the attached sheet with what information you may know or can identify.** We will be glad to help you with this, if you need assistance, please contact:

Garret Press: gpress@cityofquinter.com

Michael Haldeman: quinterpublicworks@gmail.com

**IF WE CAN NOT IDENTIFY YOUR LINES
THE EPA & KDHE WILL FORCE US TO DIG UP
YOUR YARD TO IDENTIFY THE LINE.

WE APOLOGIZE FOR ANY INCONVIENCE &
WE THANK YOU FOR YOUR COOPERATION.**
